

AVID NEXIS | CLOUDSPACES

Instantly expand your Avid NEXIS storage to the cloud

Free up Avid NEXIS® storage space and safely back up projects to the cloud. For small- to medium-size news, sports, and post-production organizations, Avid NEXIS | Cloudspaces™ provides a super-simple way to park projects in the cloud, as well as sync onsite Avid NEXIS workspaces for easy offsite backup.

Available as an add-on service for all Avid NEXIS systems, Cloudspaces enables teams to store media in the cloud with ease and scale capacity on demand for uninterrupted production. Get greater workflow and cost efficiency in a fully integrated solution that's easy to set up and manage, reducing costs, risk, and administrative errors.

BACK UP AND PARK PROJECTS WITH EASE

Forget the complexity and expense of setting up and maintaining offsite backups. Avid NEXIS | Cloudspaces lets you sync or park content from on-premises Avid NEXIS workspaces to the cloud using Marquis Workspace Tools, Windows File Explorer, macOS Finder, and other common tools. With greater efficiency and security than risky manual processes. And without requiring an IT degree.

KEEP PRODUCTION MOVING

When production runs high and Avid NEXIS runs out of space, there's no need to turn to NAS or external drives when deadlines and budgets are tight. Instead, you can park inactive media, finished content, and suspended projects in Cloudspaces. It eliminates the tedium of offloading and shuttling media around, auto-provisioning your cloud storage, so you can stop wasting time and simply start creating.

LEVERAGE THE POWER OF AVID NEXIS

If you know Avid NEXIS, working with Avid NEXIS | Cloudspaces is super simple. Get all the robust workspace management and user access control of Avid NEXIS in an easy-to-manage and deploy cloud-based storage service. And because Avid NEXIS manages your cloudspaces alongside your workspaces, you can spend less time searching and wrangling media and more time creating.

KEY FEATURES

- › Safely park media in the cloud to free up Avid NEXIS storage space
- › Quickly set up and maintain an offsite backup of your media projects
- › Store, find, and retrieve the content you need, quickly and easily
- › Scale storage capacity on demand and provision cloudspaces as needed
- › Eliminate the media wrangling and shuttle of external drives to keep production moving
- › Easily configure and manage your cloudspaces and on-premises workspaces in one interface
- › Leverage the power of Avid NEXIS user control for end-to-end security
- › Minimize the cost, risk, and administrative errors of maintaining external devices
